Block 10. PREPARATION INSTRUCTIONS (Continued)

10.2.4 The PBLI shall include a listing of the contractor provided data associated with the equipment/system. The authorized configuration of this data shall be defined by the documents identified in the Product Base Line Index. Each item of contractor provided data identified in this listing shall include the document number, the latest authorized document revision and the document title.

10.3 Military specifications. This section shall include a listing of military specifications which define the authorized configuration of the equipment/system. Each entry shall include the revision letter, date and title of the specification.

10.4 Contractor specifications. This section shall include a listing of contractor specifications which define the authorized configuration of the equipment/system. Each entry shall include the document number, revision letter and title of the specification.

10.5 Government furnished information. This section shall include a listing of government furnished information which define the authorized configuration of the equipment/system. Each entry shall include the document number, revision letter, approved Engineering Change Proposals and the title of the document.

10.6 Technical manuals. This section shall include a listing of technical manuals which define the authorized configuration of the equipment/system. Each entry shall include the government number, contractors name/number, revision level, revision date and title of the document.

10.7 Contractor drawings. This section shall include a listing of contractor drawings which define the authorized configuration of the equipment/system. Each entry shall include the document number, revision letter, approved Engineering Orders and the title of the document.
