

**ADOPTION NOTICE**

SAE TA-STD-0017, “Product Support Analysis,” was adopted on 16 April 2014, for use by the Department of Defense (DoD). This standard was originally issued by TechAmerica, but is now published by SAE International. Proposed changes by DoD activities must be submitted to the DoD Adopting Activity: U.S. Army Materiel Command, Logistics Support Activity (LOGSA), Building 3307, Mauler Road, Redstone Arsenal, AL 35898-7466 ATTN: Logistics Data Standards (AMXLS-AL). Copies of this document may be purchased from SAE International, 400 Commonwealth Drive, Warrendale, PA 15096-0001, [www.sae.org](http://www.sae.org).

This standard defines analysis required to define the support system for new products, systems and end items. SAE TA-STD-0017 is a new and improved replacement for the cancelled MIL-STD-1388-1A. The application of SAE TA-STD-0017 is recommended for DoD Programs by tailoring the Statement of Work (SOW) to reflect Section 813 (FY13 NDA) and Better Buying Power 2.0 requirements and using MIL-HDBK-502A guidance for defining which activities are included in the SOW.

**Custodians:**

Army – TM  
Navy – AS  
Air Force – 10

**Adopting Activity:**

Army – TM

**Review Activities:**

Army – AT, AV, CR, GL, MI, PT  
Navy – EC, SH  
DLA – LS

**NOTE:** The activities listed above were interested in this document as of the date of this document. Since organizations and responsibilities can change, you should verify the currency of the information above using the ASSIST Online database at <https://assist.dla.mil>.
